

Jonathan Vu

(714)-280-3815 | Irvine, CA | jtvu04@gmail.com | [LinkedIn](#) | [Github](#)

EDUCATION

University of California, Irvine

Expected Graduation: Dec 2025

B.S. in Computer Science, Minor in Statistics

Relevant Coursework: Data Structures & Algorithms, Web Development, Machine Learning and Artificial Intelligence, Software Testing and Quality Assurance, Advanced Python Programming, Advanced C/C++ Programming

EXPERIENCE

Full Stack Website Developer

Remote

Freelance

June 2024 - Present

- Developed and maintained a dynamic website for a musician with over 200k monthly listeners using NextJS and TailwindCSS
- Collaborated closely with the client to continuously improve website features in order to enhance user engagement and site performance
- Integrated Supabase as the backend infrastructure to efficiently manage merchandise and user data
- Implemented Shopify for ecommerce integration, streamlining the musician's merchandise sales process

Home Depot

Laguna Hills, CA

Associate Position

July 2024 - Present

- Employed proactive customer service strategies to resolve issues, address concerns, and maintain customer satisfaction
- Managed the store's inventory by restocking items, tracking stock levels, and coordinating with other departments to maintain smooth store operations

Art Farm Labs | Ecommerce Platform

Remote

Backend Developer

March 2024 - June 2024

- Utilized agile methodologies to develop an ecommerce platform for young entrepreneurs
- Built full-stack software components for user authentication and database management with Supabase
- Integrated Sanity CMS to develop server-side components, enhancing frontend development efficiency
- Coordinated with sponsors to align with their needs and ensured the project met strict deadlines

Spirit CHB Inc | Customs Brokerage

Cypress, CA

General IT Assistant

June 2023 - 2024

- Created automation scripts to streamline invoice processing by using Python and Microsoft Power Automate
- Managed website updates, authored regulatory content, and provided customer support
- Assisted in various administrative tasks such as office IT setup and updating shipment records into the company's database

PROJECTS

Viet Learning - Education

WebApp | Personal Project

August 2024

- Integrated Azure AI Speech Services for Vietnamese phonetic analysis and personalized pronunciation feedback
- Developed full-stack components for an intuitive interface, enabling progress tracking and goal setting

Note Taking Assistant

April 2023

WebApp | UCLA Hackathon

- Collaborated with a team of four to build an application that leverages large language models to assist students in taking notes and engaging with the class material
- Implemented OpenAI's Whisper model to transcribe large audio files and CohereAI to generate summaries and practice questions, creating a computationally efficient speech-to-text analysis platform

MediRemind - Health

MobileApp | Congressional App Challenge

January 2021

- Partnered with a team of four programmers to develop an application that supports the elderly, particularly those with Alzheimer's, by incorporating features such as medication reminders and cognitive skill games.
- Utilized technologies such as Android Studio, Adobe XD, and Figma
- Recipient of the **Congressional App Challenge Award** for the CA-47 district, amidst over six thousand apps
